

MAKERS LOCAL 256

Exploring Creativity, Ingenuity
and Resourcefulness.

Junk-Box Swap Meet & Open House

Saturday November 15th - Noon O'Clock to 4

Do you like to **Tinker**? Does your concept of “**Hacking**” reach beyond just software? You might be part of a burgeoning movement of “**Makers**.”

Part “gear-head”, inventor, techie, and artist with a dash of mad scientist. Maker’s Local 256 has recently formed to support those urges. We will be hosting an open house and “Junk-Box Swap-Meet.”

Come meet the gang, check out some tech demos, and our latest creations while you swap motors and modems, pulleys and printers for wires and winches, relays and rheostats.

But please . . . leave your CRT's at home.

As seen on the inter-web @ [hackaday](#), [gizmodo](#), and [endgadget](#)

3409 Governors Drive, a little tan house across from the Inergi Building.
